

#21 JUNIOR REFEREES TRAINING SHEET

Shooter Protection (Covering a Shot):

Referees should have full coverage on obvious situations in their primary area. A shot is an obvious play – always! The correct way to referee a shooting situation is to use a 1-2-3 technique for shooting situations. When used properly this technique provides the details for a possible foul or fake call. The action needs to have the contact to be illegal.

1-2-3 technique on shooting situations

- a) Referee the defence all the time.
- b) Check the play in following order **1.** Hands **2.** Body **3.** Feet (landing).
- c) Stay with the play until the shooter has returned to the floor.
- d) Only then turn your attention to the ball & rebounds.
